

Aberporth Coastal Repair

Client

Ceredigion
County Council

Location

Aberporth
Ceredigion

Date

2014

The works involved coastal repairs of the flood defence walls to Aberporth Harbour. The existing wall needed to be removed and replaced with a new concrete section. Underpinning of an old arch bridge was also necessary.

- Excavation of sand to expose existing sea wall foundation.
- Cutting through the existing 800mm thick sea wall and removing a section ready for repair.
- Installation of stainless steel dowels.
- Erection of formwork and false-work for new wave return wall.
- Underpinning and concrete works.
- Landscaping and fencing works
