

Felinfach Remedial Earthworks

Client

Ceredigion
County Council

Location

Felinfach
Ceredigion

Date

2012

The works consisted of strengthening the existing road which was at danger of collapse. During the course of the strengthening works, the road was also widened with new kerbs and drainage system installed.

- Excavation to a depth of 1m to remove soft material and disposal to licensed tip.
- Installation of Tensar Geo-grid membrane to help support the new carriageway.
- Filling and compacting material to finished levels.
- Installation of new drainage gullies and manholes.
- Construction of new headwalls.
- Kerbing works.
- Resurfacing existing highway inclusive of lining works.
- Landscaping and fencing works
