

Gamallt Side Support

Client

NMWTRA

Location

Cardigan
Ceredigion

Date

2014

The works involved installing a new concrete edge beam to support the edge of the existing carriageway. The edge beam was reinforced and installed in 6m bays. The complete road width was then resurfaced with the thin surface course system.

- Scarifying tarmac on existing carriageway
- Excavation and disposal of material to a licensed tip.
- Installation of steel cages, erection of formwork and pouring of concrete beams.
- Waterproofing concrete works.
- Kerbing works
- Resurfacing of carriageway with thin surface course system.
- Landscaping and fencing work
