

Tanybwllch Sea Defence

Client

Ceredigion
County Council

Location

Aberystwyth
Ceredigion

Date

2014

The works involved coastal repairs to the existing rock armour and concrete slab at the harbour area at Tanybwllch. Works had to be carried out in conjunction with the tide. The works were also within an SSSI so TTS worked closely with the ecologist to ensure works were carried with minimal disruption.

- Excavation and removal of existing block stone and storing on site for re-use.
- Installation of new and repairing of old pilings and railings.
- Installation of new 5tonne block-stone within railings.
- Excavation and installation of new reinforced concrete slab.
